

Team Polaris Contract

This contract outlines the procedures, schedules, technologies, responsibilities, and expectations the team will follow throughout the HCIN 620 project. Its purpose is to establish clear expectations for how team members will communicate, collaborate, complete assigned work, and contribute to delivering a professional final product. These guidelines may be revised or updated as needed if the team agrees that changes are necessary.

Team Members:

Name	Email
Chris Dougall	crd3973@rit.edu
Nolan Figueroa	nf9540@rit.edu
Natasya Queentina	nq3486@rit.edu
Shreya Rana	sr3296@rit.edu

Code of Ethics

As a project team, we will:

- Treat all team members with courtesy and respect.
- Work proactively by anticipating potential problems and taking reasonable steps to prevent them.
- Actively listen to each other's ideas, suggestions, and concerns.
- Be honest and transparent when sharing information, concerns, or decisions related to the project.
- Make decisions based on what is best for the team and the overall project.
- Remain committed to the project through its completion.

Team Communication

As a project team, we will:

- Present ideas clearly and concisely.
- Communicate through the channels defined in the Expected Technologies section.
- Respond to team messages within **24 hours on weekdays** and **48 hours on weekends**.
- Ask for help early if we are unable to complete an assigned task or believe we may miss a deadline.
- Inform the team of any progress, blockers, delays or changes that may affect another members' work or the overall project.

Team Schedule

As a project team, we will:

- Meet weekly on **Monday 12:00 p.m (EST)**, with all members expected to attend.
- Provide at least **3 hours' notice** if unable to attend a scheduled meeting.
 - Members who miss a meeting are responsible for following up with the team to understand what was discussed, what they missed, and what is expected for the upcoming week.
- Be prepared to provide a progress update on assigned work during each weekly meeting.
- By **Monday at 11:59 p.m. (EST) each week**, each team member will post an update in the Slack group chat identifying the work they intend to complete that week.
- Schedule additional meetings between team members as needed to discuss or complete project work.

Division of Work

As a project team, we will:

- Treat tasks assigned to each member as that member's responsibility unless the team agrees to reassign or redistribute them.

- Divide and assign work for each assignment during the weekly team meeting.
 - Work will first be distributed based on each member's skills and preferences. Availability and project needs will be considered when necessary to ensure that all required work is covered.
 - If a team member's assigned workload is significantly lower than the rest of the team without an agreed-upon reason, the team may redistribute work through a majority vote.

Work Expectations

As a project team, we will:

- Evaluate completed work based on the requirements of the assignment rubric and any additional standards agreed upon by the team.
- Evaluate each member's individual effort and contribution separately through peer evaluations.
- Have at least one other team member review completed work and provide constructive feedback as soon as reasonably possible through an appropriate communication or collaboration channel defined in the Expected Technologies section, or during the weekly meeting.
 - If revisions are identified during the review, the team member responsible for the work will make the necessary changes by an agreed-upon deadline.

Accountability and Deadlines

As a project team, we will:

- Complete each assigned task by the deadline determined by the team.
- Notify the team through Slack as soon as we become aware that an assigned task cannot be completed by its deadline and propose a reasonable revised deadline for the team to agree upon.
- Proactively keep **Jira**, along with any other applicable platforms defined in the Expected Technology section, up to date with current task assignments, progress, status changes, and deadlines.

Consequences

As a project team, we will:

- Use a **three-strike system** for violations involving **communication, meeting attendance, and deadlines**.
 - A failure to respond to team messages within the communication timeframes established in this contract may result in one strike.
 - Missing a scheduled meeting without providing the required notice may result in one strike.
 - Missing an agreed-upon task deadline without notifying the team beforehand and receiving approval for a revised deadline may result in one strike.
 - Strikes accumulate across all three categories and are **not tracked separately** for communication, attendance, and deadlines.
 - A strike may be waived when a team member provides reasonable notice or a valid explanation, in accordance with the expectations outlined in the relevant sections of this contract.
 - Each strike will be communicated to the team member so that they are aware of the issue and have an opportunity to correct it.
 - Upon receiving a third strike, the team may contact the professor for guidance or intervention.
- Address work-quality issues separately from the three-strike system.
 - If completed work does not meet the standards established in the Work Expectations section, the reviewer will provide constructive feedback and the assigned team member will be given an opportunity to revise the work.
 - If the work still does not meet the agreed-upon standards after **two revision attempts**, the team may provide additional support, reassign the task, or adjust the member's responsibilities as appropriate.
- Understand that repeated poor-quality work, lack of participation, failure to fulfill assigned responsibilities, or failure to meet the expectations established in this contract may be reflected in the individual team member's peer evaluation.

Expected Technology

As a project team, we agree to utilise the following platforms:

Communication	Slack (primary), Email
Design / Prototyping	Figma
Project Planning	Jira
Documentation	Google Docs, Google Drive, GitHub
Meeting notes buddy	tl;dv
Additional technologies may be added if all team members unanimously agree.	

This Contract will take effect on **Tuesday, September 8 2026**.
